

SYNTHETIC TEST DOCUMENT — EQUIPMENT SPECIFICATION

Golden E2E test corpus | Not an actual MRPL document

Document identity

Document ID: EQ-SPEC-201A-01
Revision: 2
Unit: Synthetic Refinery Test Unit

Equipment data

Field	Value
Equipment Tag	FV-201A
Service	Reboiler Condensate
Design Pressure	45.0 barg
Design Temperature	316 °C
Material	316L Stainless Steel
Valve Type	Globe
Nominal Size	4 inch
Corrosion Allowance	3.0 mm

Operating limits

Parameter	Value
Normal Operating Pressure	38.0 barg
Normal Operating Temperature	285 °C
Maximum Allowable Working Pressure	45.0 barg

Ground-truth note

For golden tests, the expected design pressure for FV-201A is exactly 45.0 barg and the specified material is exactly 316L Stainless Steel.
